Can Liners

NOVA® Co-Ex/2-Ply Coreless Can Liners

Two layer film strength. This quality adds significant strength and toughness (dart strength) to the liner and makes zippering (straight-line tear) obsolete. Multi-Directional Film Barrier. Two layers of film complement one another in a way that adds significant strength to the can liner. One layer of film is applied vertically and the other horizontally. The end result is the same as using two can liners for the price of one. This technique is used to hide any flaws that is typical of reprocessed material and allows the user to cut costs by using a thinner material without giving up strength. Nova uses recycled material which comes with an SCS certified label on every case that meets LEEDS certification.

Strongman Coreless Roll Can Liners

Made with a combination of LLDPE and LD resins. LLDPE has a high tensile strength and high impact and puncture resistance. It is very flexible and will elongate under stress. This provides the extra strength, elasticity and performance at lower mil weights. LLDPE also has a good resistance to chemicals; they will perform well in temperature extremes and confine odors. LD is the most common plastic used to make can liners, as it is rather soft and flexible. By blending it with LLDPE, the strength increases without losing the thinner mil weights and flexibility. Has a star-seal bottom. Perforated coreless roll.

Pitt Plastics Interleaved Roll Can Liners

Our High Density Can Liners provide a unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins. They are puncture resistant, possess impressive film strength and perform under temperature extremes of -40F to 212F. As an added bonus, the formulation of the high density bag confines odors. High Density liners are USDA and FDA approved for food use.

Can Liners

Pitt Plastics Mini-Roll Can Liners

The unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins is puncture resistant, possesses impressive film strength and performs under temperature extremes of -40°F to 212°F. The high molecular weight of the High Density Polyethylene resin allows us to produce can liners that are approximately one-third the weight of traditional can liners with the same capacity. A lower weight bag of superior strength means less material is being used in production, making the High Density Mini-Roll a good choice when searching for a product sensitive to source reduction responsibility. Perforated for easy dispensing.

LK® TUF-R® Linear Low Density Gusset Bags

Tuf-R® Linear Low Density Polyethylene (LLDPE) bags provide extra strength and puncture resistance compared to low density bags of the same gauge. Because of this, it's often possible to use a lighter gauge Tuf-R® bag to do the job of a heavier gauge LDPE bag, which saves money and helps to reduce the environmental impact. Tuf-R® bags are made from virgin materials, so they comply with USDA and FDA requirements for use in food applications.

**Dart® Safe Seal® Bowls w/Flat Lids**

MicroTrim™ Edge contributes to tamper resistance by inhibiting the ability to lift up the lid from the base without tearing the hinge. TamperAlert™ hinge protrudes outward when torn, alerting the customer that the container has been opened. Hinge remains attached to the container, no loose pieces, no littering. 360° leak resistant perimeter seal. Recessed stacking platform. Offset opening tabs makes bowls easier to open. Subtle sidewall ribbing. Crystal clear container.

Southern Champion Corrugated Pizza Boxes

These New York Style, corrugated cardboard pizza boxes are sturdier than paperboard, which makes them ideal for larger and thicker pizzas. The corrugated board also helps keep food warm for longer. The stronger structure also allows you to stack boxes, without them sagging and crushing the food inside. This box can also be used for other foods, like cookies, pastries, sandwiches or sushi. Made in the USA.

Dart® Foam Hinged Lid Containers

Hinged containers available non-perforated or with the PERFormer™ perforated hinge that allows the container's lid to be removed. Stackable. Secure closure. Has high insulation properties to keep hot food hot and cold foods cold. The vented container comes with the PERFormer™ perforated hinge. Vent holes on sidewalls of the lid preserve food quality (i.e. crispiness) by allowing steam to escape. These containers feature either a double lock closure or a "knuckle" locking tab intended to prevent accidental openings. When closed, a perimeter seal keeps food secure, reducing leaks. Tabs on base ensure container stay closed when picked up by the lid. Also available in black.

Dart® ClearPac® SafeSeal Containers

Specifically designed to inhibit tampering, eliminating the need for shrink bands and wrap labels. The TamperAlert Hinge protrudes outward when torn, alerting the customer that the container has been opened. The hinge remains attached to the container, for no loose plastic pieces. These containers function as an easy to re-close and re-open, leak resistant two piece container once the hinge is torn. Has exceptional performance in cold temperatures and accommodates freezing down to -22°F.

Pactiv EarthChoice™ SmartLock® Hinged Lid Containers

EarthChoice™ SmartLock® hinged lid containers are made from Talc-Filled Polypropylene which contains on average 40% less plastic polymers than standard polypropylene containers. This hybrid material is microwaveable up to 250° degrees F (121° C) and is ideal for your hot food take-out menu items. The textured sidewalls provide secure handling. The soak through resistance resists grease, moisture and helps to eliminate messy leaking.

Dart® Impulse® LX® Foam Cups

Customers shouldn't need to rely on "double cupping" their paper hot cups to avoid burning their fingers. Dart's Café G® stock printed foam cups keep hot beverages hot and cold beverages cold while remaining comfortable to the touch. Because this premium line of insulated ThermoGlaze® cups keeps beverages at their proper serving temperature, coffee will taste fresher longer than when it's served in a paper cup. The Café G coffee-themed design incorporates a subtle color coding system to help customers and employees identify the correct cup size.

Dart® J Cup® Insulated Foam Drink Cups

Maintain beverages at their optimal temperature longer with Dart insulated foam cups. Not only do Dart foam cups keep beverages at their proper serving temperature on the inside, they keep hands comfortable on the outside. Hot or cold, insulated foam delivers drinks the way they were meant to be. Fill line etched inside mouth of cup that indicated level at which cup should be filled. Lip provides comfort while drinking and gives additional strength to cup. Sidewall provides insulation, preserving beverage integrity. Lip stack allows easy separation and increases the speed of the operator. Pedestal raises bottom of cup to allow it to rest steadily on flat surface. Made in the USA with US and global materials.

Paper Hot Drink Cups

Bare® by Solo® Eco-Forward® Single Sided PLA Hot Cups

Our PLA-lined hot cup is fully compostable in a commercial compost facility, where it is designed to quickly disintegrate and fully biodegrade. Cup is lined with PLA (poly lactic acid) a plant-based resin which acts as a moisture barrier to prevent leaking replacing the petroleum-based lining typically found in paper hot cups. Made from 100% plant-based renewable resources and made with SFI® certified paperboard. Meets the ASTM D6868 standard and certified by the Biodegradable Products Institute (BPI) as compostable in a commercial composting facility. USDA BioPreferred®. One lid fits the 4 most popular cup sizes for operational efficiency. Rolled rim gives rigidity to the cup and ensures secure leak-resistant lid fit.

Plastic Heavy Weight Cutlery

EMI Yoshi GlimmerWare™ Cutlery

A simple and sophisticated style. Ideal for formal or casual dining. Adds a realistic look to any table setting. Mirrors the illusion of premium flatware. Generously sized making them comparable to European cutlery used in the finest restaurants and hotels. We round our fork tines and the bowls of our spoons are deep and smooth around the edges. Our knife blades are finely serrated to easily cut through most foods. Our handles are balanced to the utensil and the unique arch of our handle feels more natural in the hand. And, our sidewalls are thick and durable which adds strength to every utensil.

Gordon Paper White MG Paper

Economical food wrapping paper. Its light 30# basis weight gives excellent yield. The "MG" is white MG paper refers to machine glazing, a process that imparts a smooth, shiny finish to the paper. This glazing occurs while the paper is being made on the paper machine. The resulting sheet is denser than other papers which aids in retarding moisture and oil penetration through the paper. These papers can be printed with customer logos with reasonable minimums. Applications include sandwich wrap, scale sheets, and pizza box liners.

Gordon Paper White Butcher Paper Sheets

This is our most economical food wrapping paper. Its light 30# basis weight gives excellent yield. The "MG" in White MG paper refers to machine glazing, a process that imparts a smooth, shiny finish to the paper. This glazing occurs while the paper is being made on the paper machine. The resulting sheet is denser than other papers which aids in retarding moisture and oil penetration through the paper. These papers can be printed with customer logos with reasonable minimums. Applications for MG include sandwich wrap, scale sheets, and pizza box liners.
